Refractive Globes

featuring LumiLock technology

# Versatility from the inside out

# Upgrade with versatile style

Whether you are looking to beautify or add a sense of security and well-being to your outdoor space, the highly configurable Hadco LED Refractive Globe post tops paired with the latest LumiLock light engine GX5 will help you achieve your goals. A multitude of exterior luminaire styles allow you to create promenades and areas exuding timeless, historical charm both day and night. The configurable LED light engine GX5 is an ideal alternative to HID sources, providing you with significant energy savings, and more choices for light levels, optics and controls.

Luminaires are available with a variety of cages, finials, roofs, pods and colors to customize the project along with various poles and brackets.[1]

Provides a quick and simple retrofit solution for existing Hadco RL and CL Series luminaires while maintaining excellent light levels.

Variety of drive current and optic choices to provide the right amount of light where you need it with color choices in warm & neutral CCTs.

Includes Service Tag, our exclusive, innovative way to provide assistance throughout the life of the product. For more details visit: signify.com/servicetag

Field capabilities to change distribution from type 3 and type 5 optics to adapt when needed.

Variety of dimming and control choices, including our Field Adjustable Wattage Selector (FAWS), to maximize energy savings and help you prepare for the future, including our exclusive Interact City.[2]

1. Distinctive logo cage enables you to create a customized visually appealing identity featuring your name, colors and logo or mascot. For more details contact Hadco.
2. For more details visit the city application areas section of: interact-lighting.com

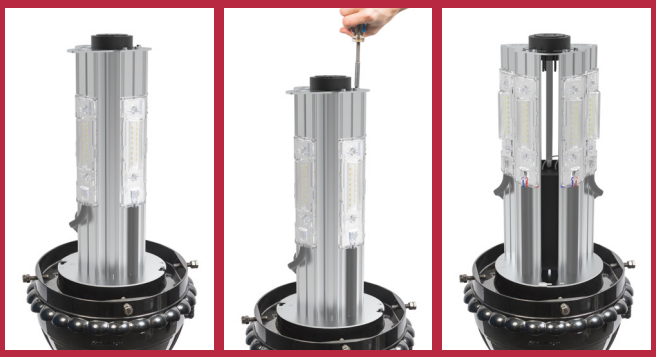
## Simple retrofit and upgrade installation

Upgrading a Hadco luminaire from a traditional lamp source or earlier generation LED to our latest LED energy saving technology doesn't have to mean a replacement of an entire luminaire. Hadco's LumiLock provides a quick retrofit solution. Simply remove the existing LumiLock assembly and replace it with the **LumiLock LED GX5 system** – that's it!



## Asymmetric or symmetric? With LumiLock LED, you have both.

As the site environment changes or your needs evolve, the LumiLock LED light engine's ultimate versatility enables you to quickly convert in the field from symmetric to asymmetric distribution or vice versa to adapt as needed. Each outer light engine is individually adjustable helping you combat light trespass in the field and enabling you to customize the distribution for your specific needs.

## Versatility in light – Short optics/Wide optics

The new Lumilock LED light engine in the RL & CL series includes even more selection beyond the typical type 3 & 5 distributions. You can choose between a Short or Wide optic distribution. Choose the Short optic if you need to place more light under the pole and maximize uniformity, or use the Wide optic to maximize pole spacings.

**Short optics**

**Wide optics**

## From simple dimming to state of the art connected lighting solutions

Further versatility can be achieved by incorporating our standalone and connected outdoor LED lighting solutions. From dimming that saves energy, to real-time alerts that enable quicker and more effective maintenance with our exclusive Interact City, Hadco LED Refractive Globe post tops with connected lighting solutions provide even greater savings and adaptability to your project requirements.

Because these post tops are renowned for their timeless historical aesthetic giving you that hometown and traditional feel in urban, suburban, campus and commercial settings, we now provide the option to order a 7 pin receptacle inside the luminaire eliminating external hardware or components that detract from the decorative aesthetic of the luminaire.
