Sternberg

DC Solar Powered Luminaires

Sternberg's **DC solar powered luminaires** readily interface with industry-standard solar power systems. This combination delivers a sustainable, off-grid lighting solution with the added benefit of simplified, trench-free installation, minimizing site disruption and labor costs.

Please consult your representative for more information on integrating your solar platform.

Features:

- Direct DC powered
- 48VDC board configuration
- Offered in 3,000K or 4,000K CCT
- For use with solar panels and DC controllers by others
