INSTALLATION AND OPERATING INSTRUCTIONS

CAT. NO. **KT-LED24T8-60GC-8XX-D**

INSTALLATION

Product includes the following components:

PARTS	QUANTITY (Distributor Pack)	QUANTITY (Carton Pack)
LED Tube	1	25 pcs/box
Installation Instruction Sheet	1	1

CAUTION: Before installing, make certain the AC power to the fixture is off.

CAUTION: The electrical rating of this product is 120-277V. Installer must confirm that there is 120-277V at the fixture before installation.

CAUTION: LEDs are extremely bright. Do not look directly at the LED light source for extended time as over-exposure may cause harm to the eyes.

CAUTION: Not rated for use in Vapor Tight style fixtures. Do not install in vapor tight style fixtures. Doing so will void the warranty.

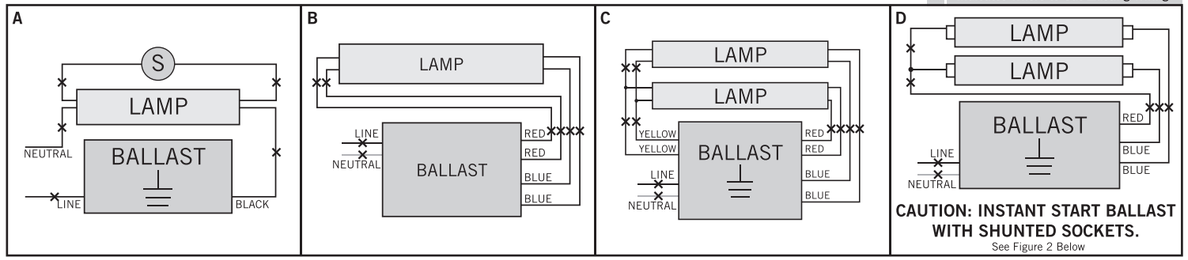

Installation Steps

Removing Existing Fluorescent System

1. Disconnect power from fixture.
2. Remove fluorescent lamp(s).
3. Remove lens and wiring compartment, if applicable.
4. Cut all wires connected to the ballast as shown below and remove ballast.

Typical Ballast Configurations

5. Identify what type of lampholders are in fixture. Direct Drive LED Tubes require non-shunted G13 medium bi-pin lampholders.

CAUTION: Use only non-shunted lampholders. Do not install product in a fixture with shunted lampholders (found in all fixtures using instant start ballasts). If the existing lampholders are shunted, remove them and replace them with non-shunted lampholders (or remove the external shunt if applicable). Make new connections directly to lampholder terminals as shown in Figure 1 below.

Tube Installation

NOTE: Only one end of this LED tube receives power. The powered end is indicated by a sticker on the Direct Drive LED tube itself and the endcap is marked with (L) for line and (N) for neutral.
NOTE: Maximum of 4 LED tubes per fixture.

1. Confirm that power is still disconnected from fixture.
2. Make sure fixture is properly grounded.
3. Follow step A for single lamp application or steps B&C for multiple lamp application, based on the number of lamps in the fixture:

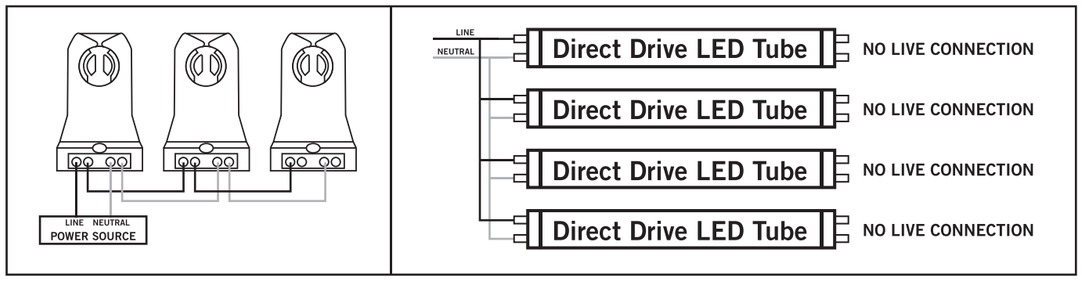

Single Lamp

A. Connect line (L) and neutral (N) AC wires to the side of lampholder which corresponds to the (L) and (N) marked on the endcap. If only one lamp is being installed, proceed to step 4.

Multiple Lamps

B. Follow the steps above for single lamp connection to connect the first lamp.
C. Connect the terminals on the powered lampholder on the first lamp to the matching terminals on the powered lampholder on the second lamp with line and neutral wires as shown below. Continue daisy-chain connection for each additional lamp.

4. Complete all electrical connections with appropriate connectors/wire nuts as needed, per all local and national electrical codes.
5. Replace wiring compartment cover.
6. Install all of the Direct Drive LED tubes with the end marked for power connections installed in the lampholders wired to the line and neutral and with the LED's pointed in the proper direction for illumination. Install any lens or diffuser as applicable.
7. Apply power to fixture and check for illumination.

To comply with the published safety standards, the following must be observed when using this LED tube:

LED TUBE MODEL NO.	INPUT VOLTAGE	INPUT FREQUENCY	INPUT CURRENT	INPUT WATTAGE	TUBE LENGTH
