#### Xitanium SR

by (Signify

XI075C105V079VSY2

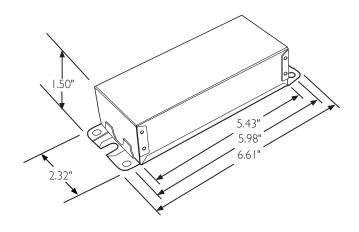

The Advance Xitanium SR LED driver (available with new firmware to improve performance) can help reduce complexity and cost of light fixtures used in wireless connected lighting systems. It features a standard digital interface to enable direct connection to SR-certified components. Functionality that ordinarily would require additional auxiliary components is integrated into the driver. The result is a simple, cost-effective light fixture that can enable every fixture to become a wireless node.

#### **Electrical Specifications**

All specifications are typical and at 25°C Tcase unless specified otherwise.

#### **Dimming Characteristics**

SR drivers use a logarithmic dimming curve as default. Dimming is accomplished through the 2-wire DALI connection to the sensor. DALI standard IEC62386\_102 Edition 2 defines the logarithmic dimming curve. DALI standard IEC62386\_101 Edition 2 defines the linear dimming curve as well as the command for switching between logarithmic and linear curves.
