

## Radialux® 5.9 Wet Location RGBW LED Tape Light

Alloy introduces the innovative new technology of the 4-in-1 5050A diode for RGBW lighting with the Radialux 5.9 RGBW Tape Light. Traditional RGBW lighting alternates separate RGB 5050 and white chips. The new 4-in-1 5050A mixes R, G, B, and W in a single diode package for brighter light using fewer watts, with better blending.

- Innovative new 4-in-1 5050A diodes seamlessly blends colors
- Perfect brightness for large accenting, retail, bars, restaurants, hospitality, home theaters, and more
- Mix of white and RGB light provides both pastel and saturated color possibilities
- Outdoor and indoor use in areas with dust and foot traffic
