The LMJA-9xxx-SM is a Network Controller designed to communicate with Wired and Wireless DLM Network Bridges, for local in-room wired networks and/or LMCP panels. It provides control, monitoring, adjustment, and standard scheduling functionality for networked DLM systems. The Network Supervisor is a PC server running similar software designed to coordinate control of multiple LMJA-9xxx-SMs and store historical data.

Features & Benefits

Provides global control of DLM segment networks and access to advanced features

Support for both Wired and Wireless DLM network Bridges

Runs Niagara N4.9 with DLM Segment Manager Station

Designed for and supports third party integration with BAS through BACnet/IP

Create, view and edit building schedules and scenes

Can support custom floor plans UI through 3rd party

Specifications

General Info

Product Line	Wattstopper	UPC Number	754182945122
Country Of Origin	United States	Application Sector	Commercial
Standard	BACnet, Niagra 4	Type	System Software

Technical Information

Compatibility	DLM Segment Manager, DLM Wired
