

IMPORTANT:

Read all instructions before installing luminaire. Retain for future reference.

SAFETY: This luminaire must be wired in accordance with local electrical codes and ordinances.

Carefully observe grounding procedure under "electrical connection" section. This product must be installed by a licensed electrician. Conform to your local building codes.

WARNING: Make certain power is OFF from the electrical panel before starting installation or attempting any maintenance.

The parts included in the packaging:

1. Cylinder housing
2. Reflector
3. Inner reflector
4. Ballast / driver tray
5. Cover (Canopy)

1. The wires are tied up for shipping purpose. Untie them.

2. Do the supply wire connections in the J-box (by others) as per the local electrical code. A certified electrician must do the connections. Install the cover (canopy) over the J-box.

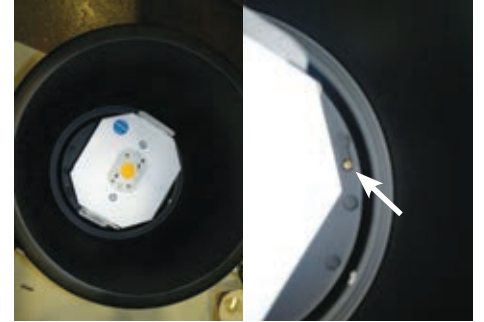

3. Do the connections to the ballast/driver tray, as per the local electrical code.

4. Install the Ballast/Driver tray on the cover (canopy) and secure it three screws.

5. Do the connection to the light engines. A certified electrician must do the connections.

6. Install the housing over the ballast/driver tray and secure it with the 4 screws.

7. Install the reflector and secure it with two screws.

8. Finally install the inner reflector.
