LED Driver

Xitanium

XH100C150V091BSY1

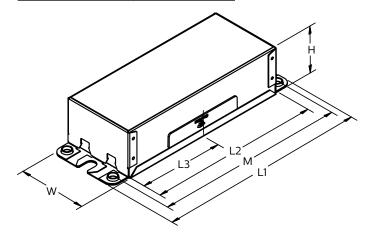

Advance Xitanium outdoor LED drivers with SimpleSet technology are designed to give OEMs ultimate flexibility. With the drivers' wide operating windows and simple programming, luminaire manufacturers can design luminaires of different sizes and lumen levels for outdoor applications.

100W 347-480V 0.1-1.5A 0-10V with SimpleSet

Features

- · 50,000+ hour lifetime¹
- Programmable output current through SimpleSet
- · Large operating window
- 6kV combi-wave surge rating to comply with ANSI C82.77-5 CAT C low

Benefits

- · Enables long life luminaire designs
- · Fast and simple way of programming
- Enables fixture designs with a wide variety of loads and adjustable current options
- No external surge protection required to pass C82.77-5 CAT C low

Application

- Area
- · Roadway
- · Parking garages
- Floodlights
- \cdot Mid-bay and low-bay fixtures

Electrical Specifications

All the specifications are typical and at 25°C Tcase unless specified otherwise.

Advance Xitanium LED drivers are manufactured to engineering standards correlating to a designed and average life expectancy of 50,000 hours
of operation at maximum rated case temperature. Minimum 90% survivals based on MTTF modeling.

100W 347-480V 0.1-1.5A 0-10V with SimpleSet

Electrical Specifications

All the specifications are typical and at 25°C Tcase unless specified otherwise.

0-10V Dimming Curve

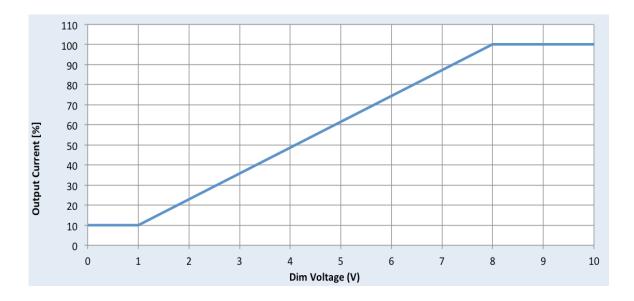

Dimming source current from the driver: 150µA (@ 0<Vdim<8V)

Minimum dim level: Factory default 10% of lout (minimum 100mA), can be programmed to a higher level via SimpleSet

Maximum output voltage on the dimming wires: 12V

Driver Output Window

Notes

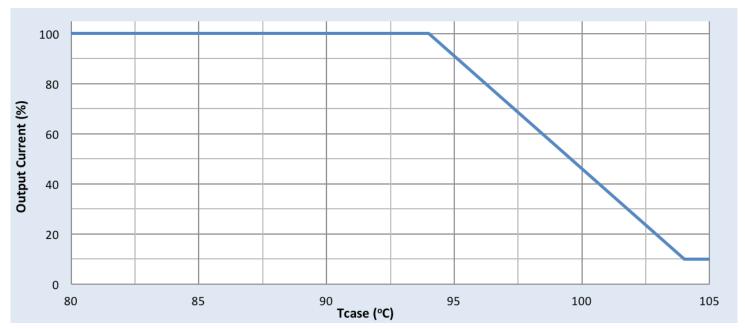

- 1. Factory default output current is 1.25A.
- 2. To get a 100% to 10% dimming range, the output current setting through AOC should be > 0.4A.

Output Current Vs. Driver Case Temperature

Note

There is ±5°C tolerance on the driver case temperature.

Driver Lifetime Vs. Driver Case Temperature

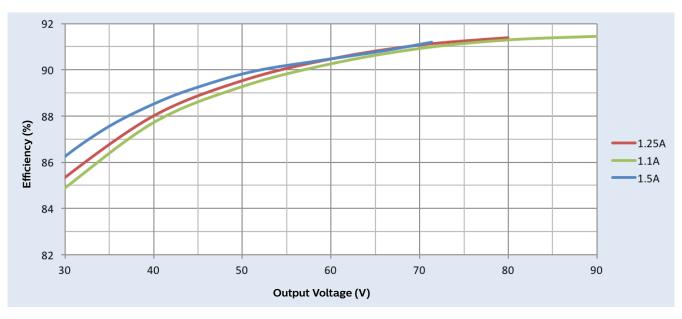

100W 347-480V 0.1-1.5A 0-10V with SimpleSet

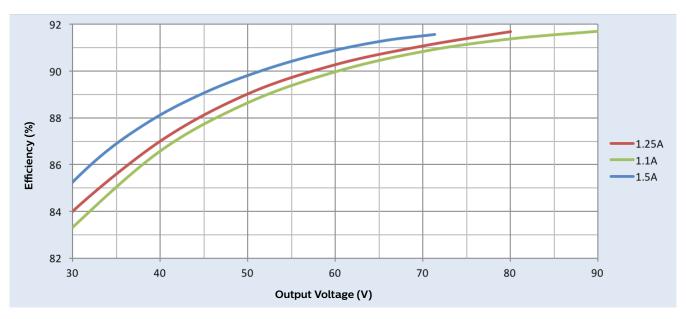

Performance Characteristics

Based on measurements on a typical sample at 75° C case. The accuracy of the measurements is within the tolerance of the measurement instruments.
