

SENSORWORX®

FEATURES

- **Secure 5-Tumbler Switch**
- **Direct Wire to Power Pack**
- **Mounting Hardware Included**

MOMENTARY KEY SWITCH

LOW VOLTAGE, STAINLESS STEEL

OVERVIEW

The **SWX-KS-MOM** is a momentary key switch that easily interfaces with a **SENSORWORX** wired or wireless power pack to enable on/off toggle control of connected lighting. This compact unit can be mounted in a standard single gang switch box and mounting hardware (stainless steel plate & mounting screws) is included. Power and signal is provided via Class 2 wiring from a **SENSORWORX SWX-900-AX** or **SWX-950-AX** series powerpack. This key switch provides an additional layer of security that restricts lighting control access to those with the appropriate key only.

APPLICATIONS

Key switches are commonly used in public spaces where authorized control is desired such as:

- Hallway/Corridor
- Gymnasium
- Classroom
- Lobby
- Locker Room
