#### **LED Driver**

#### Xitanium

# W. H.

XI077C320V024FNS1

The Advance Xitanium portfolio provides high-performance and reliable driver solutions for lighting applications. The Xitanium LED drivers with both constant voltage (CV) and constant current (CC) mode are compatible with respective loads and allow the user to utilize the same driver for CV and CC applications. The drivers provide general illumination for outdoor applications, including LED signs and canopy lights. They can also be used in indoor CV applications such as strip and bar lights or under-cabinet lighting, ambient lighting and low-bay and high-bay industrial lighting.

#### 77W 120-277V 3.2A

#### **Features**

- 50,000+ hour lifetime<sup>1</sup>
- · Excellent thermal performance
- Can be used in constant current (CC) or constant voltage (CV) mode<sup>2</sup>

#### **Benefits**

- · Enables long life luminaire designs
- Allows luminaire designs for a wide range of ambient environments

#### **Application**

- · Area
- · Roadway
- · Ambient, bar and strip lights
- · Exterior and canopy lighting

#### **Electrical Specifications**

All the specifications are typical and at 25°C Tcase unless specified otherwise.

Advance Xitanium LED drivers are manufactured to engineering standards correlating to a designed and average life expectancy of 50,000 hours of operation at maximum rated case temperature. Minimum 90% survivals based on MTTF modeling.

<sup>2.</sup> For active constant voltage (CV) loads, operation with desired CV loads must be verified for the load range specified in the end application.
