Section III – UL Conditions of Acceptability (File E321253)

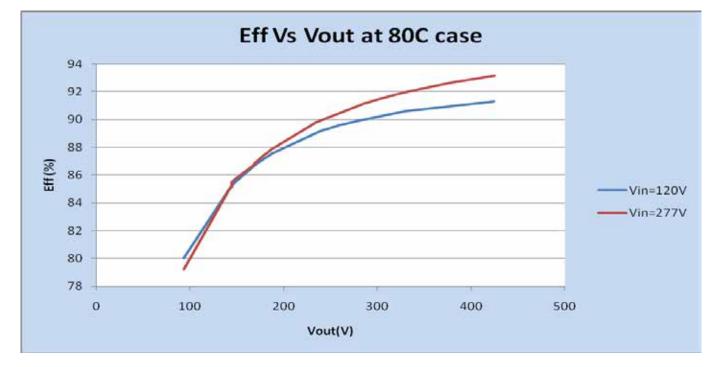

- When installed in the end-use equipment, the following are among the considerations to be made:
- 3.1 The equipment shall be installed in compliance with the enclosure, mounting, spacing, casualty and segregation requirements of the ultimate application.
- 3.2 Consideration should be given to measuring the temperatures on electronic components of power circuits and transformer windings when the unit is installed in the end-use equipment based upon mounting orientation, operating ambient and ventilation. Magnetic components L2, T3, L5 and T2 employ Class I 30 (B) insulation.
- 3.3 These drivers should be used within the recognized ratings.
- 3.4 The driver is suitable for use in "DAMP" and "DRY" locations.
- 3.5 The maximum available output parameters from the (0-10V) dimming circuit provided on LED driver model LEDINTA0350C425DO were tested in accordance with supplement (SB) of LI 935 and were found permissible for co
- LEDINTA0350C425DO were tested in accordance with supplement (SB) of UL935 and were found permissible for connection via Class 2 wiring.
- 3.6 When the drivers are installed in the end-use application, the case temperature should not exceed the temperature limits specified in the following table:

| Model No. | Input Voltage, Hz | Max. Case @ Tc, °C |
|-------------------|------------------------|-----------------------|
