

Rev. C

#### **Features**

- Compact Metal Case with Excellent Thermal Performance
- Full Power at Wide Output Current Range (Constant Power)
- Adjustable Output Current (AOC) with Programmability
- Isolated 1-5V/1-10V/10V PWM/3-Timer-Modes Dimmable
- **Output Lumen Compensation**
- Input Surge Protection: DM 6 kV, CM 10 kV
- All-Around Protection: OVP, SCP, OTP
- IP66 / IP67 and UL Dry / Damp / Wet Location
- **SELV Output**
- TYPE HL, for use in a Class I, Division 2 hazardous (Classified) location
- 5 Years Warranty

## **Description**

The EUM-240SxxxDG series is a 240W, constant-current, programmable IP67 LED driver that operates from 90-305Vac input with excellent power factor. It is created for many lighting applications including high bay, high mast and roadway, etc. The high efficiency of these drivers and compact metal case enables them to run cooler, significantly improving reliability and extending product life. To ensure trouble-free operation, protection is provided against input surge, output over voltage, short circuit, and over temperature.

#### **Models**

Adjustable Output	Full-Power	Default	Input	Output	Max.	Typical		Factor	Model Number	
Current Range	Current Range (1)	Output Current	Voltage Range(2)	Voltage Range	Power	Efficiency (3)		220Vac	(5) (6)	
70-1050mA	700-1050mA	700 mA	90~305 Vac/ 127~300 Vdc	115~343Vdc	240 W	94.0%	0.99	0.96	EUM-240S105DG	
105-1500mA	1050-1500mA	1050 mA	90~305 Vac/ 127~300 Vdc		240 W	93.5%	0.99	0.96	EUM-240S150DG	
215-3500mA	2150-3500mA	2150 mA	90~305 Vac/ 127~300 Vdc		240 W	93.0%	0.99	0.96	EUM-240S350DG <sup>(4)</sup>	
420-6700mA	4200-6700mA	4900 mA	90~305 Vac/ 127~300 Vdc	1X~5/ V/CC	240 W	92.5%	0.99	0.96	EUM-240S670DG <sup>(4)</sup>	

Notes: (1) Output current range with constant power at 240W

- (2) Certified input voltage range: UL, FCC 100-277Vac; otherwise 100-240Vac.
- (3) Measured at 100% load and 220Vac input (see below "General Specifications" for details).
- (4) SELV output.
- (5) To order BIS approved model, please use suffix "DB" in place of "DG" (ex: EUM-240S105DB).
- (6) All the models are certificated to KS, except EUM-240S105DG.

Parameter	Notes				
Over Temperature Protection	Decreases output current, returning to normal after over temperature is removed.				
Short Circuit Protection	Auto Recovery. No damage will occur when any output is short circuited. The output shall return to normal when the fault condition is removed.				
Over Voltage Protection	Limits output voltage at no load and in case the normal voltage limit fails.				

## **Dimming**

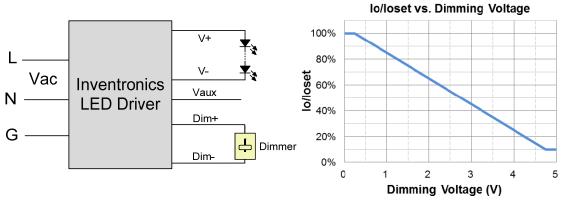

## • 1-5V Dimming

The recommended implementation of the dimming control is provided below.

**INVENTRONICS** 

Implementation 1: Positive logic

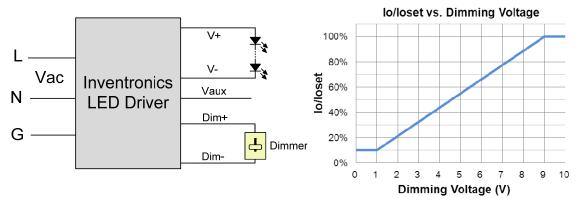

Implementation 2: Negative logic

#### Notes:

- 1. The dimmer can also be replaced by an active 1-5V voltage source signal or passive components like resistors and
- If 1-5V dimming is not used, Dim + should be open.
- When 1-5V negative logic dimming mode and Dim+ is open, the driver will output maximum current.

#### 1-10V Dimming

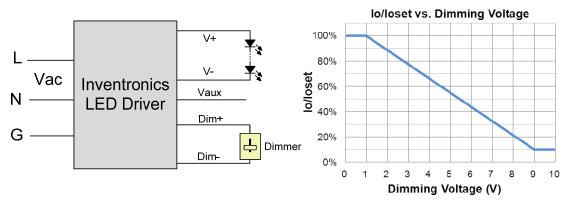

The recommended implementation of the dimming control is provided below.

Implementation 3: Positive logic

10/16

INVENTR®NICS

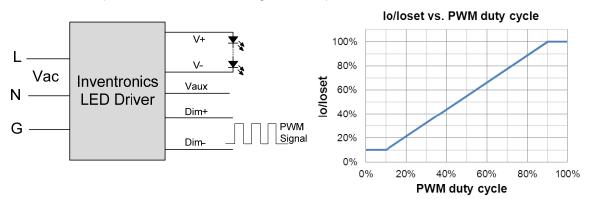

Implementation 4: Negative logic

#### Notes:

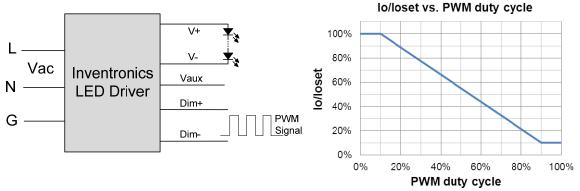

- 1. The dimmer can also be replaced by an active 1-10V voltage source signal or passive components like resistors and
- If 1-10V dimming is not used, Dim + should be open.
- When 1-10V negative logic dimming mode and Dim+ is open, the driver will output minimum current.

## 10V PWM Dimming

The recommended implementation of the dimming control is provided below.

Implementation 5: Positive logic

Implementation 6: Negative logic

#### Notes:

- 1. If PWM dimming is not used, Dim + should be open.
- 2. When PWM negative logic dimming mode and Dim+ is open, the driver will output minimum current. 11/16

Specifications are subject to changes without notice.

Rev. C

EUM-240SxxxDG

## Time Dimming

Time dimming control includes 3 kinds of modes, they are Self Adapting-Midnight, Self Adapting-Percentage and Traditional Timer.

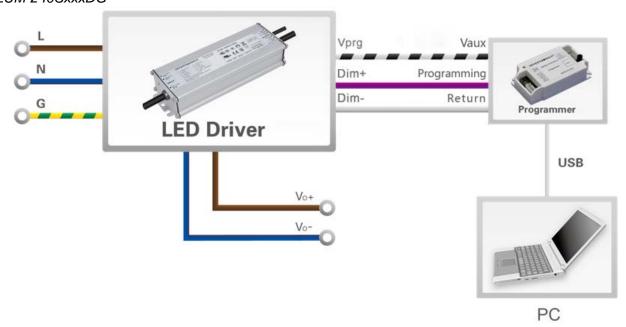

- **Self Adapting-Midnight**: Automatically adjusts the dimming curve based on the on-time of past two days (if difference <15 minutes), assuming that the center point of the dimming curve is midnight local time.
- **Self Adapting-Percentage**: Automatically adjusts the on-time of each step by a constant percentage = (actual on-time for the past 2 days if difference <15 min) / (programmed on-time from the dimming curve).
- Traditional Timer: Follows the programmed timing curve after power on with no changes.

## Output Lumen Compensation

Output Lumen Compensation (OLC) may be used to maintain constant light output over the life of the LEDs by driving them at a reduced current when new, then gradually increasing the drive current over time to counteract LED lumen degradation.
