EUD-200SxxxBVA

Rev. D

Features

- Ultra High Efficiency (Up to 94.5%)
- Full Power at Wide Output Current Range (Constant Power)
- Thermal Sensing and Protection for LED Module
- DALI/3-Timer-Modes Dimmable
- Dim-to-Off with Standby Power ≤ 0.5 W
- Always-on Auxiliary Power: 12Vdc, 200mA (Transient Peak Current up to 400mA)
- Output Lumen Compensation
- Input Surge Protection: DM 6kV, CM 10kV
- All-Around Protection: OVP, SCP, OTP
- IP67
- SELV Output
- 7 Years Warranty

alobal-mark∘

Description

The *EUD-200SxxxBVA* series is a 200W, constant-current, programmable LED driver that operates from 90-305 Vac input with excellent power factor. Created for many lighting applications including high bay, high mast, arena and roadway, etc, it provides a dim-to-off mode with low standby power. The high efficiency of these drivers and compact metal case enables them to run cooler, significantly improving reliability and extending product life. To ensure trouble-free operation, protection is provided against input surge, output over voltage, short circuit, and over temperature.

Models

Adjustable Output	Full-Power	Default	Input	Output	Max.	Typical		Factor	Model Number
Current Range	Current Range (1)	Output Current	Voltage Range(2)	Voltage Range	Power	Efficiency (3)		220Vac	(6) (7)
70-1050mA	700-1050mA	700 mA	90~305 Vac/ 100~250 Vdc	95~286Vdc	200W	94.5%	0.99	0.96	EUD-200S105BVA ⁽⁴⁾
140-2100mA	1400-2100mA	1400 mA	90~305 Vac/ 100~250 Vdc	48~1430/00	200W	94.0%	0.99	0.96	EUD-200S210BVA ⁽⁴⁾
245-3500mA	2450-3500mA		90~305 Vac/ 100~250 Vdc		200W	93.5%	0.99	0.96	EUD-200S350BVA ⁽⁵⁾
385-5600mA	3850-5600mA	4900 mA	90~305 Vac/ 100~250 Vdc		200W	93.0%	0.99	0.96	EUD-200S560BVA ⁽⁵⁾

Notes: (1) Output current range with constant power at 200W.

(2) Certified voltage range: 100-240Vac or 100~250 (except CCC, PSE and KS).

(3) Measured at 100% load and 220Vac input (see below "General Specifications" for details).

(4) Certificated to Global-mark.

(5) SELV output.

(6) All the models are certificated to KS, except EUD-200S105BVA.

(7) For BIS models add suffix -3000.

Standards Compliance (Continued)

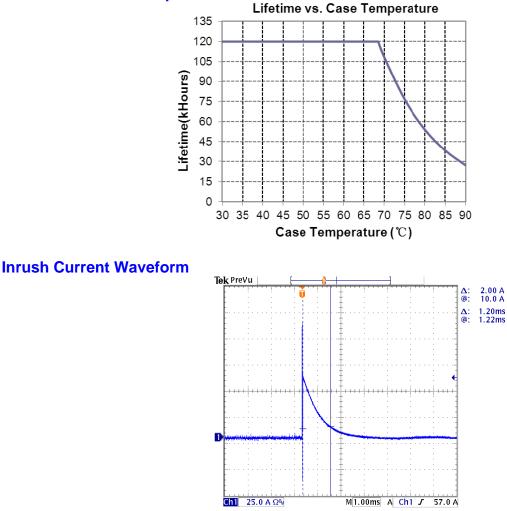

DALI Standards	Notes
DALI	IEC62386-101,102 & part of 207 ⁽³⁾

Note: (1) This LED driver meets the EMI specifications above, but EMI performance of a luminaire that contains it depends also on the other devices connected to the driver and on the fixture itself.

(2) To perform electric strength (hi-pot) testing, the "GDT ground disconnect" (nut and metal lock sheet) on the driver end-cap should be removed temporarily to prevent the internal gas discharge tube from conducting (as allowed by IEC 60598-1 Clause 10.2). After testing is completed, these items must be reinstalled to restore line-to-earth surge protection and secure the end cap.

(3) Optional Commands Implemented: 242 (query short circuit), 243 (query open circuit)

Protection Functions

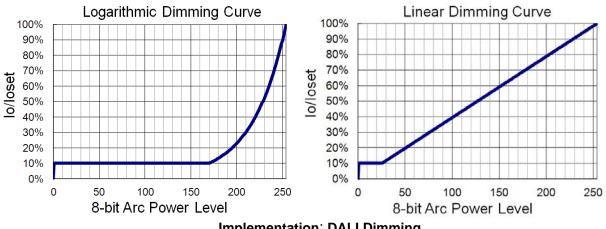

Parameter		Min.	Тур.	Max.	Notes		
External Thermal Protection	R1	-	7.81 kOhm	-	When R_NTC falls below R1, External Thermal Protection is triggered, reducing output current until R2 is reached.		
	R2	-	4.16 kOhm	-	When R_NTC is less than R2, output current is reduced to the programmed "Protection Current Floor."		
NTC	Protection Current Floor	10%loset	60%loset	100%loset	10%loset > lomin (default setting is 60%)		
		Iomin	60%loset	100%loset	10%loset ≤lomin (default setting is 60%)		
Over Tempera	Over Temperature Protection		Decreases output current, returning to normal after over temperature is removed.				
Short Circuit Protection		Auto Recovery. No damage will occur when any output is short circuited. The output shall return to normal when the fault condition is removed.					
Over Voltage Protection		Limits output voltage at no load and in case the normal voltage limit fails.					

Dimming

DALI Dimming

The recommended implementation of the dimming control is provided below.

Implementation: DALI Dimming

Specifications are subject to changes without notice.

All specifications are typical at 25°C unless otherwise stated.

EUD-200SxxxBVA

Rev. D

• Time Dimming

Time dimming control includes 3 kinds of modes, they are Self Adapting-Midnight, Self Adapting-Percentage and Traditional Timer.

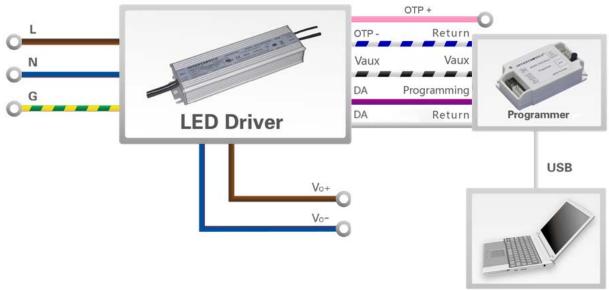

- Self Adapting-Midnight: Automatically adjusts the dimming curve based on the on-time of past two days (if difference <15 minutes), assuming that the center point of the dimming curve is midnight local time.
- Self Adapting-Percentage: Automatically adjusts the on-time of each step by a constant percentage = (actual on-time for the past 2 days if difference <15 min) / (programmed on-time from the dimming curve).
- Traditional Timer: Follows the programmed timing curve after power on with no changes.

• Output Lumen Compensation

Output Lumen Compensation (OLC) may be used to maintain constant light output over the life of the LEDs by driving them at a reduced current when new, then gradually increasing the drive current over time to counteract LED lumen degradation.
